PROJECTS

Credit card fraud detection System - HTML/CSS based Website

The Credit Card Fraud Detection System is a web-based application developed using HTML and CSS for the user interface, integrated with a machine learning-based backend to identify fraudulent credit card transactions

Resume Screening Application (Full Stack)

Resume Screening System built using MERN stack. It allows recruiters to upload resumes, automatically extracts candidate details, matches skills with job requirements, calculates a match score, and displays ranked results on a dashboard. This system reduces manual effort and speeds up the recruitment process.
